### ***Double Patenting***

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 10-12, 17-20 and 23 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-12 of U.S.

Patent No. 6,665,576. Although the conflicting claims are not identical, they are not patentably distinct from each other because the organization elements in the claims and their function are merely obvious variations of each other. It would have been obvious to one of ordinary skill in the art at the time the invention was made to rewriting the claims in different combination. Please note that the limitations of claims 10-12, 17-20 and 23 are covered in claims 1-12 of the patent.

As for claims 11, 12, 13, 17-20, the elements are fully disclosed in claims of 11, 3, 7-10, respectively, of the patent.

As for claims 10 and 23, the elements are fully disclosed in claims 1, 3, 5 and 9, of the patent.

As for claims 24-27, since claims are depend on rejection claims, claims 24-27 also rejected.

***Response to Arguments/ Response to Amendment***

2. Applicant's arguments filed October 12, 2005 have been fully considered but they are not persuasive. Applicant canceled independent claims 9 and 13, and add new independent claim 23. Applicant argues for the new independent claim 23 which included the limitation "generating a correlation matrix based on the plurality off data" Applicant argues it is not the same invention as claims of U.S. 6,665,576. However, Examiner disagrees since the limitations of claim 23, "generating a correlation matrix based on the plurality off data", is same as the limitations of claim 5, "*obtaining a set of matrix elements using a matrix calculator, based on the standardized sample values*". Since claim 23 is the combinations of claims 1, 2, 5, and 9. Claim 23 is the same invention as the claims of patent 6,665,576.

***Conclusion***

3. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

Art Unit: 2125

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
